

TRAINING PROGRAM · COHORT 1

Claude Code for N2 players

Format: a common core, then 1 track of your choice, or both

Session: November 2026, live and remote

Trainers: Jessy Martin and Michel Conter

Version: October 5, 2026

Jessy Martin Academy · contact@jessem.fr

1 At a glance

Claude Code is already part of your missions, and every player uses it in a different way. This training sets a shared base: a common core that everyone takes, then a day given to your own job. If you like, you can take both tracks, which makes 3 days.

Item	Details
Duration	2 days, or 3 days with both tracks, split into 2-hour workshops
Format	remote and live, every workshop recorded and available as a replay
Language	French or English
Group size	10 seats, each day confirmed once 6 people sign up
Price	€900 for 2 days, €1,350 for 3 days, per person, without VAT
Included	e-learning and entry quiz, N2 skills, course materials and certificate

2 The course in 3 stages

Stage	Content	Who it's for
Before, online	verified basics: e-learning and entry quiz	everyone enrolled
Day 1, the common core	4 workshops of 2 hours, including the between-missions one	everyone, together
Day 2, the track	functional track or technical track	depending on your job
Day 3, optional	the second track	those who want both

Passing the quiz confirms your place in the cohort. The common core brings every profile together, and the track then splits them up.

3 Day 1: the common core

4 workshops of 2 hours, taken by everyone enrolled.

Workshop	What you do
1 · Install and set the frame	your workstation, repositories, keys and permissions. What leaves your machine, and what stays on it
2 · Configure once and reuse everywhere	project files, memory, commands, subagents, and the Claude skills written for N2 players
3 · Your between-missions use cases	your skills file, your mission search, your own business
4 · Guardrails and compliance	client data, secrets, traceability, and the AI literacy obligation of the EU AI Act

Workshop 3 is there for when a mission ends

Between missions, a player has time and few tools. This workshop puts Claude Code to work for your own business:

- **your skills file:** rework it, adapt it to each targeted mission, and get a short version out of it;
- **your mission search:** spot the offers that match your profile, prepare your interviews, and write your replies without spending your days on it;
- **your own business:** your commercial proposals, your client follow-up, your content.

4 Day 2: 2 tracks for 2 jobs

You choose your track when you enroll, or both. Each track takes a separate day: with both, your course grows to 3 days.

Functional track with Jessy Martin

For functional consultants, project managers and PMOs. Automate your recurring deliverables, produce documents and reports in series, connect your business tools through connectors. Everyone leaves with an agent built on their own process.

Technical track with Michel Conter

For developers, integrators and architects. Claude Code in the development cycle: review, refactoring, tests, agents in integration pipelines. Secrets, permissions and isolation included.

5 A format that fits your mission

No one takes 5 days off a mission.

- **2-hour workshops**, which fit into a mission week.
- **Montréal, Paris, Asia**: every workshop is recorded and stays available as a replay.
- **A client calls during a workshop**: you catch up on the replay, and your questions are picked up at the next workshop.

The content is built from your actual work: a questionnaire sent to the whole collective, then a pilot group of volunteer players who review the course outline before the cohort opens.

6 The trainers

Jessy Martin · functional track

Marketing and communication lead at N2 for 4 years, AI trainer and founder of Jessy Martin Academy. He is an AI ambassador of “Osez l’IA”, the national plan of the French Ministry of the Economy. He runs the functional track on the workflows he uses every week, on N2 files.

Michel Conter · technical track

N2 player based in Luxembourg, ServiceNow ITOM expert. He has worked for large organizations in banking, telecoms and air freight, on CMDB governance and ITOM. He runs the technical track as a player, with cases taken from the collective’s missions.

7 What you leave with

- **A certificate** issued by a registered training provider, with an assessment of what you learned. A document you can show a client.
- **Missions within reach**: the certificate opens missions that require an established practice of Claude.
- **Time saved from the next day**: the building blocks set up in the common core work on your current files, and carry over from one client to the next.
- **Skills that stay**: written for N2 players, they keep working on your missions after the session.

8 Assessment and certificate

Stage	What happens
Before	positioning questionnaire (context, expectations, self-assessment from 1 to 10), then e-learning and entry quiz
During	exercises on your own files, checked by the trainer during the workshop
At the end	assessment of what you learned and individual end-of-training certificate
After	satisfaction survey right after the course, then a follow-up on real use 60 to 90 days later

9 Prerequisites and equipment

- Pass the entry quiz, after the e-learning.
- A computer with administrator rights, to install Claude Code.
- An active Claude Pro or Max subscription, at your own cost.
- A stable connection, and a headset with a microphone.

You work on your own documents. Third parties' personal data, and information covered by trade secrets or by the confidentiality of your missions, stay out of the exercises. The trainer reminds everyone of this rule at the start of each workshop.

10 Price and enrollment

€900 per person for 2 days, common core and 1 track. **€1,350** for 3 days, common core and both tracks. That comes to €450 per day, the public rate on our price list. Jessy Martin Academy, a training provider, invoices without VAT.

- **You book your seat on the N2 ticketing site (Odo)** by October 23, 2026, with nothing to pay at this stage.
- **Jessy Martin Academy then sends you the training agreement or the training contract**, followed by its invoice, which you pay directly. A training agreement is signed if your company pays, a training contract if you pay personally. In the second case, you have a 10-day withdrawal period after signing. Jessy Martin Academy assesses what you learned and issues the certificate.
- **15% off for participants of the N2 Fall Gathering 2026**, applied to the invoice.
- **Each day is confirmed once 6 people sign up**: the common core, the functional track and the technical track.
- **Access lead time**: at least 15 days between signature and start.
- **Next sessions**: December 2026, then February, April and June 2027.

To book your seat: n2.help/claude-code-training. To ask a question: Jessy Martin, jessy@jessem.fr.

Disability. Any adjustment request (materials, pace, duration, assessment) is studied with you. Send it at least 15 days before the start. Disability contact: Jessy Martin, contact@jessem.fr.

Complaints. In writing to contact@jessem.fr. We acknowledge receipt, look into the request and reply in writing.

Results indicators are published at jessem.fr/qualite-formation.
